Dear David: your letter of some time ago bears no date so I don't know how overdue this answer is - but it's plenty I'm sure. Actually I have a mind that is scientifically oriented, but my training is journalistic. However, my imagination is supplemented by exhaustive reading - and when ever I need technical advice, which is often and in many fields, I go ask an expert - and don't you think I don't get them up a tree ever so often. My son is a graduate of Colorado Mines and that covers a lot of territory in Science and he also has a degree from Florida U. and Electronics - he helps plenty. I hold no degrees, I am a practical geologist, paleontologist and I stomp around in anthropology with some assurance. I am 64. I created Alley Oop in 1930. I have no complete record of my caveman's many adventures. How this knowledge can be of a to you, I don't know... But you're welcome.

Regards
-V. T. Hamlin
